Field Photo App

Purpose:

Field Photo allows students, scientists, researchers and citizens to take photographs of their environment, geotag them and add land cover metadata and field notes to address the grand challenges in our dynamic and rapidly changing planet Earth and the society.

Directions:

1. Use the QR code on the other side to download the app.
2. Create an account.
3. Use existing pictures or take new pictures of outside land cover and upload them to the app.
